

Series 6000-S Systems

Water Filter Systems
Food Service

The CUNO® Series 6000-S filters are complete single vessel systems designed for ease of operation and contain an automatic valve that stops the water flow simply by twisting the cartridge. This feature not only eliminates the need for external valves, but also prevents the water supply from being accidentally turned on with the cartridge removed.

All CFS6000-S Series systems use CUNO proven valve-in-head technology and are constructed completely of FDA approved food grade, high impact plastic. This high tech feature engineered into each system allow the compact design to be installed in locations where other filters could not.

All CFS6000-S series filter systems include CUNO's proven consistent feed scale inhibitor. The CFS6000-S Series systems reduce the costly effects of water related problems common in coffee brewing equipment such as: scale build-up on heating coils, scale and sediment clogged spray heads, and clogged or stuck internal valves.

Three premium systems are available for different water conditions.

CFS6812-S uses premium graded density carbon technology to reduce chlorine taste/odor for 6,000 gallons (22,712 liters), and cysts down to 0.5 micron.

CFS6112-S uses premium graded density technology to reduce chlorine taste/odor for 10,000 gallons (37,854 liters) and particle reduction down to 1 micron.

CFS6720-S uses a built-in premium graded density prefilter in combination with highly activated granular carbon for 8,000 gallons (30,283 liters) or chlorine taste/odor removal and particle reduction down to 5 micron.

The CUNO Series 6000-S line of filter systems are designed for strength, versatility and convenience.

Features

- Built-in automatic shut-off valve in filter head.
- Automatic pressure venting.
- Pressure tested. High impact plastic construction.
- 3/8" NPT vertical connection.
- Time released scale inhibiting system.
- Manufactured of FDA CFR-21 compliant materials.
- Compatible with different CUNO premium filter cartridges.

Benefits

- No external valves. No need to turn off water supply prior to removing cartridge, eliminates the chance of cartridge removal with water on.
- No need to manually vent pressure by opening or operating equipment downstream of filter.
- Lead free and corrosion resistant. Trouble free self lubricating design for years of trouble free service.
- Compatible with most common food service equipment and tubing.
- Protects equipment against scale and down time.
- Suitable for use in food service establishments.
- Allow a choice of filters to provide the degree of filtration and cost of operation the operator desires.

COFFEE

Series 6000-S Systems

CFS6812-S/CFS6112-S/CFS6720-S

Specifications:

Dimensions: 14-3/4" x 3-5/8" (37.5 cm x 9.2 cm)

Service Flow Rate: 1.5 gpm (5.7 lpm)

Pressure: 125 psi (862 kPa)

Temperature: 100°F (38°C)

Model	Water Condition	Efficiency	Chlorine Removal*	Brewers	Coffee and Tea Urns
CFS6812-S	Cyst Reduction	0.5 Micron	6,000 gal. (22,712 liters)	All 12 cup brews and combinations	up to 15 gal. (56.8 liters) - cold water only
CFS6112-S	Normal Water	1 Micron	10,000 gal. (37,854 liters)		
CFS6720-S	Problem Water	5.0 Microns	8,000 gal. (30,283 liters)		

*As tested in accordance with NSF Std. 42.

Installation Tips:

- Always check that electricity is turned off to Food Service equipment before turning off water supply.
- A small amount of water will escape when removing cartridge due to pressure automatically being vented.
- When changing cartridges the Model CFS6720-S with the CFS8720-S cartridge should be flushed to vent trapped air and carbon fines. This will quickly clear.
- For cold water use only.
- For commercial use only.

LIMITED ONE-YEAR WARRANTY

CUNO, Inc. warrants to the original purchaser-consumer that this Product is free of defects in materials and workmanship. Any defect, malfunction, or other failure of the product to conform to this Warranty will be remedied by CUNO in the manner provided below.

This warranty, together with any and all warranties implied by law, shall be limited to a duration of one (1) year from the date of original purchase by the consumer.

This Warranty does not apply to defects that result from abuse, misuse, alteration or damage not caused by CUNO.
