WMF 1300 S

Perfect for smaller locations with a desire for great coffee, the WMF 1300 S delivers professional coffee perfection, compactly created and elegantly designed. It offers premium features usually found only in larger models with the highest standard of flexibility and portability. Designed for venues with an average daily requirement of 75 cups, the WMF 1300 S is the ideal model for providing the very best in coffee, crafted with distinction and designed to perform.

FEATURES

Smart Milk System

The Smart Milk system enables you to expand beyond the classic cappuccinos, latte macchiatos and lattes. With Smart Milk you can tap into cold milk mixed beverages too, automatically dispensing cold milk as well as hot milk or hot milk foam. Should handmade milk foam be on the menu, it can be created whenever desired using the optional Basic or Auto Steam wand.

USER FRIENDLY

7 inch customizable and intuitive user-interface is ideal for both self-serve and staff operated environments.

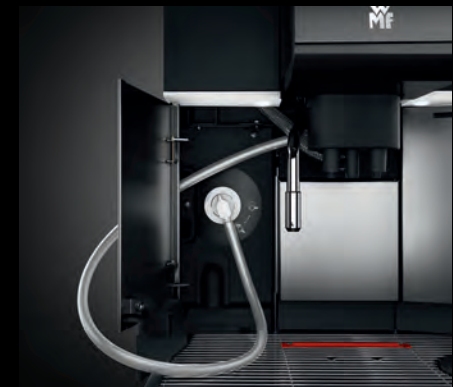

PROFESSIONAL BREWER

Constructed with a state-of-the-art polymer to guarantee an extra-long service life and maximum reliability, the professional brewer in the WMF 1300 S is lightweight, removable and has a 15g capacity.

STEAM JET

Featuring innovative WMF technology, the SteamJet warms every cup in a few seconds using the natural power of steam. So every beverage is not only served at the ideal temperature but also remains hot for longer, for true coffee perfection.

SMART CLEAN SYSTEM

The Smart Clean System operates in the same way as the Easy Clean system, with the added advantage that the milk line can be rinsed with hot water only for the daily clean. This can significantly reduce the usage of milk and coffee cleaning tablets.
